Application Deadline: Until position filled

Summer Internship

Nationwide Insurance is seeking a candidate for a full-time Summer Internship to assist the Distribution Planning and Market Analytics team. This team creates solutions for marketing, strategy and distribution planning activities through the analysis of internal and external data using GIS and related techniques.

Primary responsibilities for this position will include the following:

- Provide mapping and analytical support services for internal clients;
- Collaborate with the team in the development of new approaches for communicating analytical results using GIS;
- Update maps, databases and related reports as needed;
- Create metadata for spatial data;
- Process special requests by assessing internal client's needs, preparing maps and other necessary documents. Presentation of findings.

General Background and Minimum Requirements:

- Completion of three years toward a four-year degree in Geography, Computer Science, Information Technology or closely related field;
- Solid conceptual understanding of GIS as well as practical experience using mainstream GIS software (ie: ESRI ArcGIS or MapInfo Professional);
- Excellent cartographic skills with documented ability to design and create effective maps and reports using custom data;
- Knowledge of GIS data management and the ability to perform GIS analysis;
- Interest in business applications of GIS for marketing, strategy and planning purposes;
- Strong interpersonal skills and communication skills;
- Proficiency with Microsoft Word, Excel, PowerPoint and Access;
- Knowledge of relational database management systems such as SQL Server, Oracle, or DB2.
