#### Job Description

Seeking an instructor to teach GIS Workshops using ArcGIS 9.3. Instructor required to teach every week in various east coast cities. Workshop participants are non-profit and public agency staff. The right person for this position is an expert ArcGIS 9.3 user, and has considerable experience conducting and mapping social research. Applicant must also enjoy teaching, be a good presenter and be able to travel extensively.

New Urban Research, Inc. is a professional social research company located in Portland, Oregon.

#### Requirements:

- Must have extensive experience with ArcGIS 9.3.
- Must have experience with community analysis.
- Must have strong quantitative analytical skills.
- Must be proficient with Excel, Access (experience with spss and sas a plus).
- Must be a strong public speaker (verbatim memorization of a script is required).
- Required to travel three to four days a week (Applicants must live near a major east coast airport).

Qualified candidates submit resume and references to [gclimmer@urban-research.info](mailto:gclimmer@urban-research.info). In the body of the email, please describe a project in which you mapped social information such as Census data or other community data.

No phone calls please. Emails will not be sent acknowledging that we received your resume. Non-East Coast residents will not be considered. Please do not apply if you do not have experience with ArcGIS 9.2 or higher.

We value diversity and we are an equal opportunity employer.
